

Advanced Associate Safety Professional (ASP) and Certified Safety Professional (CSP)

BSI will be hosting an Advanced Associate Safety Professional (ASP) and **Certified Safety Professional (CSP) Examination Preparation Workshop** presented by SPAN™ International Training LLC. This advanced ASP/CSP exams preparation workshop is tailored for professionals dedicated to a fast track approach of achieving the CSP certification. This fast-paced 3-day course is designed for those holding a Graduate Safety Professional (GSP) designation and at least 4 years of experience as a safety professional. Participants will be provided with both sets of the ASP and CSP workbooks and access to the ASP and CSP online Certbok learning management system consisting of more than 1000 problems representative of the examination blueprint. An expert facilitator will deliver the curriculum using hybrid learning activities of lecture, facilitated group discussion, case studies and self-directed learning.

At the completion of the advanced ASP/CSP prep workshop participants will learn to:

- Interpret exam blueprints
- Understand and apply both BCSP philosophy, and SPAN recommended test taking strategies
- Identify and close individual knowledge gaps
- Design an individual study plan that ensures exam success
- Solve answers to representative exam questions
- Become familiar with resources available to prepare for the exam
- Utilize information about certification requirements and scoring procedures in your test preparation

Advanced concepts and themes include:

- Advanced math and science
- Safety management systems
- Risk management
- Environmental management systems
- Emergency management
- Training, education, and communication techniques
- Occupational health and ergonomics
- Professional conduct, ethics and law

The workshop includes professionally published ASP and CSP Exam Study Workbooks, BCSP approved scientific calculator, pencils, notepad, highlighter, and SPAN™ offers the CertBok® online learning management system for both the ASP and CSP.
