

Key Questions to get you started...

- Are there things being thrown away?
- Does runoff leave the site via point source?
- Has anyone determined if this waste has additional requirements?
- How close is the nearest navigable water?
- Do we have CERCLA hazardous substances?
Quantity?
- Is water used in any way beyond “domestic uses”?
- How is process water disposed of?
- Potential for past, present, or future releases?
- How much oil storage is available on site?
- What is stored/used on site? What thresholds apply?
- Are fluids placed below ground surface for infiltration?
- What is being shipped to or from the facility?
- Are there stationary (air) sources at the site?
- Does rain/snowmelt come in contact with industrial/construction activity?
